

# Secure File Gateway for Web Downloads

Secure everything employees download, no matter what it is or where it came from.

Do You Know

## What Your Employees Are Downloading?

Whenever employees download a file, they open your business up to attack. Threats often hide inside innocent-looking files, making them incredibly hard to spot, no matter how much training employees may do. And because today's detection-based tools aren't designed to catch every threat, we're rolling the dice with each download.

Votiro for Web Downloads:

## Secure 100% of Downloads With Positive Selection

Secure File Gateway singles out only the elements of files known to be fully secure, guaranteeing downloads are 100% safe. Now no matter what employees download or where they download it from, Votiro ensures that every file is safe and your business is free from harm.

### Know every download is completely safe

Ensures every downloaded file is harmless before it enters your organization

### Be more productive with zero interruptions

Runs invisibly in the background, with virtually no latency

### Protect every download without blocking access

Removes the need for IT middle-men to unblock access, so you can open downloads immediately

## How It Works

## Fits Right in. Won't Ever Know It's There.

**Easy implementation:  
less than 10 minutes**

**Seamless integration with  
existing solutions**

**Zero training required**

**Supports both  
Cloud & On-Prem**

## We Know Files.

In an ever-changing threat landscape, today's solutions simply aren't enough. NGAVs can't keep up with undisclosed threats and zero-day exploits, while sandboxes aren't securing us from even basic threats. With our deep understanding in file composition and weaponization, we developed an entirely new approach to file security. One that doesn't just block any threat it could find – it eliminates threats from entering in the first place. With Votiro, files simply don't pose a threat to your business anymore.

## About Votiro

Founded in 2010 by leading file security experts, Votiro is trusted by large enterprises, including top Fortune 500 companies to completely eliminate file-based threats while ensuring zero interruption to business. Headquartered in the United States, with offices in Australia, Israel and Singapore, Votiro is trusted by 400 companies and 2 million users worldwide to safely access files with complete peace of mind.
